

NOTICE TO PSYCHIATRY PATIENTS

Medication Management

- 90-day prescriptions will be written only at the time of the appointment. 2-4 week medications will be called into the local pharmacy to bridge the gap.
- Adderall, Ritalin and Vyvanse will be written only at the time of appointment. Absolutely no 90-day prescriptions without seeing the patient. These prescriptions cannot be mailed.
- Psychiatrist requires the patient to check their prescriptions prior to appointment so prescriptions for 30 days or 90 days can be written at the time of the appointment.
- Monthly appointments are required for Suboxone prescriptions.
- Requests for refills from pharmacies or mail-order outlets will not be honored. In other words, when you are getting low on meds, you, the patient, must call for refills. At that time, we will process your request, either retail pharmacy or mail-order outlet.
